PREFACE

The format of this index is adapted from that of the Index Medicus.

The main subject headings are essentially the same as those in the Index Medicus. Since most of the headings have but one or two titles under them, we have eliminated the subheadings in all but a few instances.

The reference for each listing shows both the number and the page on which the article begins. For example:

COOKE RE: Research in the etiology of mental retardation 1:54
refers you to issue number 1 (January), page 54.

The arrangement of sections is as follows:

Part I Subject Index Pages

Part II Author Index Pages
